

The flowchart illustrates the sequence of prompts used in the first 46 iterations of the model. It is organized into three columns and six rows. The prompts are categorized as 'Full Prompt' or 'Tapered Prompt' and are numbered sequentially from 10 to 46. The sequence starts with a 'Full Prompt' (10) and a 'Help Prompt' (24) in the first row. Subsequent rows show a progression of 'Full Prompts' and 'Tapered Prompts' with some cross-column connections. For example, in the second row, a 'Full Prompt' (12) leads to a 'Full Prompt' (26), which then leads to a 'Help Prompt' (36). The sequence continues with 'Full Prompts' (14, 28, 40) and 'Tapered Prompts' (16, 30, 42) in the third and fourth rows. The fifth row shows 'Tapered Prompts' (18, 32, 44) and the sixth row shows 'Tapered Prompts' (20, 34, 46). The flowchart demonstrates a structured progression of prompts, likely designed to guide the model's learning process.
